ELSEVIER

Volume 69, Nos. 1–3, September 1997

Journal of
Materials
Processing
Technology

Contents

A review of ultra high speed milling of hardened steels 1
R.C. Dewes, D.K. Aspinwall

Study on modeling of wire EDM process 18
T.A. Spedding, Z.Q. Wang

Fuzzy set theory applied to bend sequencing for sheet metal bending 29
S.K. Ong, L.J. De Vin, A.Y.C. Nee, H.J.J. Kals

Simulation of slab edging by the 3-D rigid–plastic FEM 37
S. Xiong, X. Liu, G. Wang, Q. Zhang

Microstructural studies of QPQ complex salt bath heat-treated steels 45
H.Y. Li, D.F. Luo, C.F. Yeung, K.H. Lau

Influence of the extrusion conditions on the flow behaviour of polystyrene melts 50
J.Z. Liang, J.N. Ness

Enhancement of plastic injection moulding quality through the use of the ABLPC nozzle 55
K.H. Lau, T.T.M. Tse

The effects of the disposition of SiC particles on the forgeability and mechanical properties of co-sprayed aluminium-based MMCs 58
K.S. See, T.A. Dean

Design and fabrication of intelligent composites based on shape memory alloys 68
Z.G. Wei, C.Y. Tang, W.B. Lee

Injection moulding of hydroxyapatite composites 75
C.P. Sim, P. Cheang, M.H. Liang, K.A. Khor

A hierarchical evaluation of the solder paste printing process. 79
F.K.H. Lau, V.W.S. Yeung

Effect of heat treatment on the plastic flow behavior of an aluminum alloy under compressive loading 90
T. Xu, W.B. Lee

Sash sheet metal development and the application of a back-propagation neural network in the calculation of the developed length 95
Z.-C. Lin, Y.-C. Chang

Effect of micro-defects on the surface brightness of cold-rolled stainless-steel strip 106
K. Kenmochi, I. Yarita, H. Abe, A. Fukuhara, T. Komatu, H. Kaito

A neutral-network approach for the on-line monitoring of the electrical discharge machining process 112
J.Y. Kao, Y.S. Tarng

Three-dimensional crystallizing π-bondings and uniaxial tensile deformation in polycrystalline metals 120
H. Oh

Three-dimensional crystallizing combined π-bonding orbitals ('O's' bonding) and electrical and mechanical properties of alloy metals 125
H. Oh

Conventional metallic bonding and three-dimensional crystallizing π-bondings 134
H. Oh

FEM analysis of cylinder twist-compression deformation regularity 148
X. Kemin, W. Zhen, L. Yan

A theoretical study of the optimum linearity conditions of the structure of an axial extensometer 152
F. Zenxiang, S. Jize, W. Shichun

Elsevier Science S.A.

The avoidance of defects in radially extruded tubular parts by preforming 155
S.B. Petersen, R. Balendra, J.M.C. Rodrigues, P.A.F. Martins

Wear and friction properties of laser surface hardened En31 steel 162
X.M. Zhang, H.C. Man, H.D. Li

A study of the rational matching relationships amongst technical parameters in stagger spinning 167
X. Kemin, L. Yan, Z. Xianming

Elasto-plastic FEM analysis and experimental study of diametral growth in tube spinning 172
X. Kemin, W. Zhen, L. Yan, L. Kezhi

The disposal of key problems in the FEM analysis of tube stagger spinning 176
X. Kemin, L. Yan, Z. Xianming

Decreasing the core loss of grain-oriented silicon steel by laser processing 180
J. Li, Y. Gu, Z. Guo

Fatigue-crack initiation in a Fe–C–Si–Mn steel with carbide-free lathy bainite 186
W. Liu, J. Qu, H. Shao

Coupled thermo-mechanical analysis of the high-speed hot-forging process 190
L. Qingbin, F. Zengxiang, Y. He, W. Shichun

Study on hole machining of non-conducting ceramics by gas-filled electrodischarge and electrochemical compound machining 198
L. Yonghong, J. Zhixin, L. Jinchun

Measurements of the changes in microstructure during superplastic deformation. 203
W. Shichun, L. Miaoquan, D. Zhixiao, L. Mabao

FEM analysis and experimental research on complex forming 208
X. Shuqin, F. Yuan

Study on the machining mechanism of WEDM with ultrasonic vibration of the wire 212
Z.N. Guo, T.C. Lee, T.M. Yue, W.S. Lau

A comparison of continuous and pulse current gas tungsten arc welds of an ultra high strength steel 222
T. Mohandas, G. Madhusudhan Reddy

The basis for a design support system to prevent defects in forging 227
M. Arentoft, T. Wanheim

The effect of electrode material on machinability in wire electro-discharge machining. 233
J. Prohaszka, A.G. Mamalis, N.M. Vaxevanidis

Investigation of the casting microstructure of a Fe-base, Cr–Ni–Mo duplex alloy 238
M. Ceylan, V. Kuzucu, M. Aksoy, İ. Aksoy, M. Kaplan, M.M. Yildirim

Investigation of the microstructures of iron based wrought Cr–Ni–Mo duplex alloy 247
V. Kuzucu, M. Ceylan, M. Aksoy, İ. Aksoy, M. Kaplan

Microstructure and phase analyses of Stellite 6 plus 6 wt.% Mo alloy. 257
V. Kuzucu, M. Ceylan, H. Çelik, İ. Aksoy

Cold forging process design based on the induction of analytical knowledge 264
Q.-C. Hsu, R.-S. Lee

The extremum parameters in ring rolling. 273
H. Lin, Z. Zhong Zhi

Design of strain-rate controlled dies for the solid phase drawing of polypropylene rod 277
I. Ulas, G. Craggs

Optimization of the gas-assisted injection moulding process using multiple gas-injection systems 282
D.M. Gao, K.T. Nguyen, A. Garcia-Rejon, G. Salloum

Analysis of the wear of a resin-bonded diamond wheel in the grinding of tungsten carbide 289
S.Y. Luo, Y.S. Liao, C.C. Chou, J.P. Chen

Author Index of Volume 69. 297

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
